Languages

- English
- Sinhala

Soft Skills

- Problem Solving
- Communication
- Self-Directed Learning
- Team Collaboration

Summary

Motivated IT undergraduate with a strong interest in Machine Learning and intelligent software systems, experienced in Python, mobile app development, and backend systems through academic and personal projects, eager to gain industry experience and contribute to ML-driven projects while continuously sharpening my technical and analytical skills.

Education

- BSC(Hons) Software Engineer** 2023-2026
University Of Plymouth
- GCE Advance Level** 2020-2022
St. John's College (Nugegoda)
- GCE Ordinary Level** 2019
Royal College (polonnaruwa)

Achievements & Highlights

- Designed, developed and deployed a live e-commerce platform (auri.lk) currently serving real customers in Sri Lanka.
- Built and shipped a personal portfolio website (imalravindu.xyz) – fully self-hosted with a custom domain.
- Delivered five end-to-end projects spanning web, mobile, and machine learning – all open source on GitHub.

Frameworks

- React.js
- Flutter
- Node.js

Languages

- Python
- Java
- C#
- JavaScript
- Dart

Database

- MongoDB
- Firebase
- MySQL

Tools

- VS code
- Docker
- GitHub
- Xcode
- Git
- Android Studio

Selected Projects

• **ML – Base Traffic Rule Violation Detection & Fine Management**

FINAL YEAR

Python , EasyOCR , YOLOV8 , Firebase

An end-to-end intelligent traffic violation detection and fine management system that uses computer vision models to detect traffic offences from camera feeds and automatically generate and track fines through a connected mobile application. The system consists of a Python-based machine learning detection engine and a Flutter mobile application for users and authorities to manage fines, receive notifications, and monitor violations. The system aims to reduce manual monitoring, improve enforcement efficiency, and digitize the entire traffic fine lifecycle.

• **AURI – Women's Fashion E-Commerce Platform**

Live

React.js , MongoDB

A full e-commerce platform built and deployed for AURI, a modern women's fashion brand in Sri Lanka. Designed the entire system end-to-end – product catalogue, shopping experience, responsive UI, and SEO – and currently hosted on a custom domain serving real customers.

Auri - auri.lk

• **Personal Portfolio Website**

Live

React.js , CSS , Custom Domain

The personal portfolio website was developed using React and traditional CSS to showcase projects, skills, and technical background. The design follows a clean, minimal black-and-white aesthetic with a component-based architecture.

• **AutoCare – Car Rental Web Application**

[GitHub](#)

Node.js , MongoDB , JavaScript

A full-stack car rental system with vehicle browsing, booking management, user authentication, and an admin dashboard. Demonstrates clean REST API design, MongoDB schema modelling, and a complete booking workflow.

• **Swapify – Skill Exchange Mobile Application**

Mobile

Flutter , Dart , Firebase Firestore , Firebase Auth

A cross-platform mobile app that lets users exchange skills with each other – teach what you know, learn what you don't. Built with Flutter and Firebase, featuring user profiles, skill matching, in-app messaging, and real-time data sync.
